

# LETTERHEAD

Name of Project Supervisor  
School of Mathematical Sciences  
XXXXX University  
Address  
City State Post Code

Date

To whom it may concern,

I am writing to recommend XXXXXXXX for an AMSI Summer Vacation Research Scholarship for 201X/201X.

XXX is a very high achieving student, with a weighted average mark (WAM<sup>1</sup>) of XX%.: Furthermore, s/he has achieved a High Distinction grade in all of the undergraduate mathematics and statistics units that s/he has completed.

XXX's skills in statistics and mathematics are well suited to the project s/he is applying for, "XXXXXXX". S/he has completed relevant second and third year units in mathematics of uncertainty, random processes, and statistical finance. In each of these units, XXX achieved a final grade of over XX%. This semester s/he is taking relevant third year units in time series analysis and mathematical statistics.

XXX has expressed an interest in higher degree research after s/he completes her/his undergraduate training. This 6-week summer project will allow her/him to experience a research environment first hand and decide if further study in mathematics is for her/him.

In summary, XXX has my strong recommendation for an AMSI Summer Vacation Scholarship in 201X/201X. If you need any further information, please don't hesitate to contact me via the email address or phone numbers provided at the bottom of this page.

Yours sincerely
