Date

To whom it may concern,

I am writing to recommend X Student for a 20XX/20XX AMSI Vacation Research Scholarship.

X is a very high-achieving student, with a weighted average mark (WAM¹) of XX%. Furthermore, s/he has achieved a High Distinction grade in all of the undergraduate mathematics and statistics units that s/he has completed.

X's skills in statistics and mathematics are well suited to the project s/he is applying for, "Project Name". S/he has completed relevant second- and third-year units in mathematics of uncertainty, random processes and statistical finance. In each of these units, X achieved a final grade of over XX%. This semester s/he is taking relevant third-year units in time series analysis and mathematical statistics.

X has expressed an interest in higher-degree research after s/he completes her/his undergraduate training. This six-week summer project will allow her/him to experience a research environment first-hand and decide if further study in mathematics is for her/him.

In summary, X has my strong recommendation for an AMSI Vacation Research Scholarship in 20XX/20XX. If you need any further information, please don't hesitate to contact me via the email address or phone numbers provided at the bottom of this page.

Yours sincerely
